

OBINNA ISHMAEL ILOANYA

Dear hiring manager,

I am a self taught Front end Web Developer who writes clean codes. As a passionate Web developer and long-time admirer of programming, I was excited to see an opening for a Web developer role in your organisation. Considering my significant experience in Web Development, I am confident I have the skills to be an asset to your prestigious organisation. I am a very fast learner, I always seek to acquire more knowledge about whatever I put my mind to do.

During my first work experience with Fobe Network before the company closed down, I gained hands-on experience coding and making websites for the company's clients, collaborating on web applications. Some of my responsibilities were developing creative solutions across a variety of web platforms, I make sure the web application is responsive, mobile friendly and since I am also a well skilled graphics designer with years experience, I was responsible for making sure the web UI looks good, interactive and very attractive. Some of my accomplishments include helping to create mobile friendly web apps, which have short load time and SEO friendly.

I was one among the three front end web developers in the company and being a small company, I was working round the clock to make sure I completed any given task. I would have loved to have a Senior Dev to assist and teach me but since I don't have any, I seek help from my childhood friend who is a senior developer for another company and Google things to make sure I execute every task and finish every project given to me.

I have attached a copy of my resume detailing my skills and experiences. I look forward to learning more about the web developer position at your prestigious organization. I can be reached anytime by phone +2348033954540 or via email iloanyaobinna@gmail.com. Thank you for your time and consideration.

Sincerely,
Obinna Ishmael Iloanya.

OBINNA ISHMAEL ILOANYA

ABOUT ME

I am a self taught web developer and i started coding in 2020. I try my best to write clean codes and I genuinely love to learn. I am currently looking for the right opportunity to work in an enviroment where I can make an impact as a frontEnd Web developer and an enviroment that will help me progress into a full-stack role.

I just want to be given a chance and an opportunity to grow as a developer. I am punctual and precise, I joke when it is time to joke and I am extremely serious when I need to be serious. My only fear is failure and the only way I can beat that is by working harder than normal which I believe i am trying to be better than the way i was yesterday

WORK EXPERIENCE

* **FOBE NETWORK** from March 2021 – September 2021.
